-gen (dʒen), *suffix*, forming *sbs.* in mod scientific use, ad F *-gène*, ultimately repr. Gr *-γενής* (f *γεν-* root of *γί-γν-εσθαι* to be born, become, *γεν-νάειν* to beget, *γένο-ς* kind, etc see Kin) an adjective suffix which has two different uses (1) giving the sense 'born in a certain place or condition', as in *οἰκο-γενής*, *ἐνδο-γενής* born in the house (respectively f. *οἶκος* house and *ἔνδον* within), (2) giving the sense 'of a (specified) kind', as in *ὁμο-γενής* of the same kind, homogeneous, *ἑτερο-γενής* of another kind, heterogeneous The F *-gène* in scientific terms has two distinct applications (of different origin) both of which have been adopted in Eng

1 *Chem* In 1777–9 Lavoisier (*Œuvres* II 249) proposed for the recently discovered element (till then known as 'dephlogisticated air', etc) the alternative names *principe acidifiant* and *principe oxygine*, which he states to be etymologically synonymous. In G. de Morveau *Nomencl. chimique* 1787 (prepared in collaboration with Lavoisier and other chemists) the sbs *oxygène* and *hydrogène* occur, and are explained to mean 'engendrant l'acide' and 'engendrant l'eau', and in Lavoisier's *Traité de Chimie* 1789 the etymon of the suffix is said to be 'Gr. *γείνομαι*, j'engendre' This etymology accounts for Lavoisier's original form *oxygine*; the change of *-gine* into *-gène* must have been due to the observation that *-gine* did not occur in Gr derivatives, while *gène*, from the same root, already existed in *hétérogène*, *homogène* (ad Gr words in *-γενής* · see above), the fact that the suffix *-γενής* in Gr words was not capable of meaning 'that which produces' was overlooked or disregarded. The names *oxygène*, *hydrogène* were soon adopted into Eng with the ending *gene*, afterwards altered to *-gen* On the analogy of these words, a considerable number of new terms have been added to the common (French and Eng) vocabulary of chemistry, in which the ending *-gène*, *-gen* expresses the sense 'that which produces', they are usually names of chemical substances, as *nitrogen*, *amidogen*, *cyanogen*, etc, rarely of classes of substances, as *halogen*, † *amphigen*.

2 *Bot* The botanical use of *gène* was introduced in 1813 by Decandolle (*Théorie de Potanique* 210) in the words *endogène*, *exogène*, adjs designating two classes of plants which respectively produce their new tissue internally (Gr. *ἔνδο-ν* within) and externally (Gr *ἔξω* outside) The formation of the words was suggested by the older terms *endorhize*, *exorhize* Decandolle gives as the etymon of the suffix *-γενεων* [*sic!*], 'j'engendre, je crois', app his *-γène* was not a new adoption from Gr *-γενής*, but a different application of the *-gène* already used in chemical terms, which he vaguely remembered to be derived from a Gr root meaning 'to produce, to grow' The adjs *endogène*, *exogène* first came into Eng in the adapted forms *endogenous* *exogenous*, Lindley *c* 1845 formed from these the sbs *endogen*, *exogen*, and he and others added many analogous terms denoting classes of plants, the first element indicating the part at which the new growth takes place, or some characteristic of their mode of growth, as *acrogen*, *amphigen*, *dictyogen*, *thalloyen*

2 *Gram.* Each of the three (or in some languages two) grammatical 'kinds', corresponding more or less to distinctions of sex) and (when such substantives are discriminated according to the nature of the modification they require in words syntactically associated with them ; the property (in a sb) of belonging to, or (in other parts of speech) of having the form appropriate to concord with, a specified one of these kinds Also, the distinction of words into 'genders', as a principle of grammatical classification

In the Indo-European langs. there were originally three genders, the masculine and feminine, to which respectively belonged the great majority of nouns denoting male and female persons or animals , and the neuter, including chiefly nouns denoting things without sex But great numbers of words denoting inanimate objects were of the masculine or feminine gender, without even any figurative attribution of sex , and in some cases the names of objects possessing sex were of the neuter gender In Semitic, and in the Romanic langs , there are only two genders, masculine and feminine In many langs the adjectives, and in some langs the verbs, have inflexions depending on the gender of the sbs to which they syntactically refer Mod English has 'natural' as opposed to 'grammatical' gender , i e nouns are masculine, feminine or neuter according as the objects they denote are male, female, or of neither sex , and the gender of a noun has no other syntactical effect than that of determining the pronoun that must be used in referring to it For *common, epicene gender*, see those words

[In Eng use in this sense follows the Lat use of *genus*, which in its turn is a rendering of the equivalent Gr *γένος*] he formulation of the three grammatical genders (*τὰ γένη τῶν ονομάτων, ἄρσενα καὶ θήλεα καὶ οὐδέτερα*) is ascribed by ARISTOTLE *Rhet* III V 10 Protagoras]

b By some recent philologists applied, in extended sense, to the 'kinds' into which sbs are discriminated by the syntactical laws of certain langs the grammar of which takes no account of sex

Thus the North American Indian langs are said to have two 'genders', animate and inanimate With still greater departure from the origin al sense, the name 'genders' has been applied to the many syntactically discriminated classes of sbs in certain South African langs.

5 (Only in *sing*) Native intellectual power of an exalted type, such as is attributed to those who are esteemed greatest in any department of art, speculation, or practice; instinctive and extraordinary capacity for imaginative creation, original thought, invention, or discovery. Often contrasted with *talent*

This sense, which belongs also to F *génie*, Ger *genie*, appears to have been developed in the 18th c (It is not recognized in Johnson's Dictionary) In sense 4 the word had come to be applied with especial frequency to the kind of intellectual power manifested by poets and artists, and when in this application 'genius' as native endowment, came to be contrasted with the aptitudes that can be acquired by study, the approach to the modern sense was often very close The further development of meaning was probably influenced by association with senses 1 and 2, which suggested that the word had an especial fitness to denote that particular kind of intellectual power which has the appearance of proceeding from a supernatural inspiration or possession, and which seems to arrive at its results in an inexplicable and miraculous manner This use, which app originated in England, came into general circulation in Germany, and gave the designation of *Genieperiode* to the epoch in German literature otherwise known as the 'Sturm und Drang' period Owing to the influence of Ger literature in the present century, this is now the most familiar sense of the word, and usually colours the other senses It was by the Ger writers of the 18th c that the distinction between 'genius' and 'talent', which had some foundation in Fr usage, was sharpened into the strong antithesis which is now universally current, so that the one term is hardly ever defined without reference to the other The difference between *genius* and *talent* has been formulated very variously by different writers, but there is general agreement in regarding the former as the higher of the two, as 'creative' and 'original', and as achieving its results by instinctive perception rather than by deliberative reason than by processes which admit of being distinctly analyzed

Gent (dgent), *sb* [Short for GENTLEMAN] = GENTLEMAN , now only *vulgar,* exc. as applied derisively to men of the vulgar and pretentious class who are supposed to use the word

Early prose examples are doubtful, as they may represent only the graphic abbreviation which was formerly common, 'Gents ' may be an editorial misreading for 'Gent's *gentils men* Early in the present century the word was colloquial and slightly jocular , about 1840 its use came to be regarded as a mark of low breeding

Genteel (dgentī·l), *a* and *sb* Forms 6-8 **gentile,** 8 **gentil,** 7- **genteel** [A re-adoption, at the end of the 16th c, of F. *gentil,* which had been previously adopted in the 13th c, and had assumed the form GENTLE

The re adoption first appears in the form *gentile,* distinguished from GENTILE (= non Jewish) by retaining the Fr pronunciation of the *i* and the stress on the last syllable It is probable that it was originally fashionable to retain the Fr nasal sound in the first syll , hence the vulgar pro nunciation represented by the spelling *genteel,* which occurs in comic literature of the early 19th c The fully anglicized spelling *genteel* came in at the end of the 17th c see also GENTEE, which corresponds more nearly to the pronunciation of the Fr word, in which the *l* is silent Another attempt to render the Fr sound is JANTY

A few years before the middle of the 19th c the word was much ridiculed as being characteristic of those who are possessed with a dread of being taken for 'common people ', or who attach exaggerated importance to supposed marks of social superiority In seriously laudatory use it may now be said to be a vulgarism, in educated language it has always a sarcastic or at least playful colouring]

2 *Zool* and *Bot* A classificatory group comprehending a number of species (sometimes a single species) possessing certain common structural characteristics distinct from those of any other group

The determination of genera and of what characteristics are to be considered generic, is more or less arbitrary and empirical, and admits of continual alteration according to current knowledge of facts and ideas of classification in the respective sciences. The genus ranks next under the family or sub family, and above the species, it is sometimes divided into sub genera The generic and specific names (always in Latin or considered as Latin) together form the scientific proper name of an animal or plant, the generic name standing first and written with an initial capital (The zoological term *the genus Homo* is popularly current as a somewhat flippant or jocular synonym for 'mankind' or 'the human race')

Geotropism (dʒɪˌɔ̱trɒpĭz'm) *Bot.* [f. as prec. + -ISM] First used in Ger. form *geotropismus* by A B Frank *Beitr. z. Pflanzenphysiol.* (1868)] A collective term for the phenomena of irritability presented by various parts of plants in relation to the action of gravity *Positive geotropism*: the tendency (of roots, etc.) to grow towards the centre of the earth. *Negative g*: the tendency (of stems, etc.) to grow away from the centre of the earth.

By C and F. Darwin (1880) the word was used in a narrower sense, as synonymous with the 'positive geotropism' of other writers, the term Apogeotropism being substituted for 'negative geotropism'. Diageotropism, the tendency (of leaves) to grow at right angles to the vertical, is a third variety of 'geotropism' in the original (and still prevalent) wider sense of the word.

1879 Bennett & Dyer *Sachs' Bot.* 758 The positive or negative character of geotropism depends as little as that of heliotropism on the morphological nature of the organ

1880 *f* Darwin in *Nature* XXXIII 179 The phenomena might result from the ordinary forms of heliotropism and geotropism acting in concert

German (dʒɜ·mən), *a* 2 and *sb* 2 Also 6 **germayne**, 6–7 **germaine**, **germane** [ad L *Germān-us*, used, as adj and sb, as the designation of persons belonging to a group of related peoples inhabiting central and northern Europe, and speaking the dialects from which the 'Germanic' or 'Teutonic' languages have been developed

The name does not appear to have been applied to these peoples by themselves, or to be explicable from their sources. A view widely held is that it was the name given by the Gauls to their neighbours, the Celtic derivations suggested are from OIr *gair* neighbour (Zeuss) and from Irish *garrm* battle-cry (Wachter, Grimm). According to Müllenhoff, *Germani* was originally the name of a group of Celtic peoples in north eastern Gaul, was transferred from these to their Teutonic conquerors, and afterwards extended to all the Teutonic peoples

The pronunciation (dʒɜ·mən), for which cf *clark*, *sergeant*, *Hertford*, was formerly fashionable, but now survives only as *dial* or *vulgar*

In English use the word does not occur until the 16th c, the sb appearing in our quots earlier than the adj. The older designations were AI·MAIN and DUTCH (DUTCHMAN), the latter, however, was wider in meaning

(*bi-*)*gitan* :—O Teut. **getan*, *gat-*, *gêtum*, *getono-*

The OAr root **gheid*, **ghod* ' to seize', take hold of', is found also in L. *præda* (—**præ-hida*) booty, *prædium* an estate, perh also in *hedera* ivy (literally the 'clinger'), and with inserted nasal in L. *prehendere* to catch, lay hold of, Gr. *χανδανειν* (aor. *ἔχαδον*) to hold, contain, to be able.

Of the compounds of *-getan* which existed in OE (see above), only *begetan* and *forgetan* survive in the modern language, and then the normal equivalents *beget* and *forget* were displaced in later ME in favour of BEGET and FORGET. Gower is app. the last author who employs *beget*, *forget* disappears in the 15th c except in Sc, where it is not yet extinct This change was prob due to the influence of the simple verb Conversely, the solitary example in ME of *geten* without prefix (sense 26) may be referred to the influence of *begeten*

The forms of the pa. pple retaining the original vowel (ON *getenn*) are found in literature down to the 16th c, and in the north midlands and Yorkshire *geten* is still a dialectal form From the beginning of the English history of the vb, however, it has, like most verbs with ME open *e* in the present stem, tended to assume the conjugation of vbs of the *e*, *a*, *o* series (originally confined to roots ending in a liquid), thus in the 14th c we find *getten*, *gatt*, *gotten* parallel with *stelen*, *stal*, *stolen* In the 16th c the pa. t was often *got*, by assimilation to the pa pple, in the 17th c this became the usual form, though *gat* is used in the Bible of 1611 and still occurs in archaistic poetry In Engl and the form *gotten* of the pa. pple is almost obsolete (exc. *dial*.) being superseded by *got*, in U S literature *gotten* is still very common, although Webster 1864 gives it as 'obsolescent'

The commonly accepted view has been that the earliest form, which is written *geugone* (Ancren Riwle) should be read as *geugoue*, that the word is a reduplicated formation from the root of Give *v* On this supposition it would be identical with Giff-gaff and the MDu *ghiveghave*, of which a single example is known But if this were the etymology, the initial would have been 3, not *g*, in the southern texts of the *Ancrene Riwle* (unless indeed these texts have been transcribed from an original in northern dialect) Further, the proposed explanation does not account plausibly for the recorded senses, and it is doubtful whether the assumed development of *gewegene* into *gugaw* (with *i*, *geugaw* (1562 C.), *gewgaw*, is phonetically possible. The probability is that the *u* in *guegone* is a vowel]

Although the word is known only in the WGer langs (in all of which it is found with substantially identical meaning), it appears to be of pre Teut formation The sense of the pre Teut **ghoisdo-z*, if the ordinary view of its etymological relations be correct, should be 'fury, anger', cf. †Gig (gig), *v.*[1] [f. GIG *sb.*[1] (sense 1).] **a.** *intr.*; **b** *trans.* (sense obscure: see below)

The verb seems literally to denote the action of some kind of 'gig' or whipping top of peculiar construction, having inside it a smaller 'gig' of the same shape, which was thrown out by the effect of rapid rotation. Hence *to gig (out)* appears to be used *fig.* with the sense 'to throw out or give rise to (a smaller repetition of itself)'. The Dicts., on the ground of the Dryden quot., have plausibly, but erroneously, explained the transitive vb. as meaning 'to engender,' assigning to it a derivation from *L. gignĕre*.

Invented by Carlyle, who gives *Miscell.* (1857) III. 56) the following as explanation of its origin: 'What do you mean by "respectable"? *A* He always kept a gig. (Thurtell's trial). This is taken from *Q. Rev* XXXVII (1828) 15, where the writer says 'We quote from memory'. Gingerly (dʒɪ nʤəɪlɪ), *adv* and *a* [f **ginger* (of obscure origin) + -LY *2*, the adj appears a few years later than the adv, and may possibly be derived from it

It seems conceivable that *ginger* may represent an adoption of OF *genser* (*genelchu, guntior, gensor*, etc), properly the comparative of *gent* GENT *a*, but used also as a positive, 'pretty, delicate' The form presents no difficulty, as the word would naturally be assimilated to GINGER *sb* The sense of the OF word agrees closely with that of *gingerly* in the earliest examples both as adj and as adv though the Eng word was almost entirely confined to one specific application (perh as a technical term in dancing) which easily developed into a sense very remote from that of the suggested etymon

It does not appear that any other plausible conjecture has yet been offered The usual comparison of SW dial *jangla, gängla*, to totter, is inadmissible, both on account of the sound (dʒ instead of (g) in both syllables of the Eng word, and for other reasons, and derivation from GINGER *sb* would not account for the adv sense]

In OE the strictly West Saxon forms of the infinitive and the pa ple show the influence of initial *g* in the substitution of *te* (commonly *t, ȝ*) for the original *e* of the root, thus *ȝiefan, ȝifan, ȝ,ifan* for *ȝefan* In other dialects the *e* was normal, except where it passed into *eo* (northern *ea*) by *u* or *o* umlaut, but occurs very frequently, partly owing to the analogy of the 2nd and 3rd pers sing pres ind, on the other hand, the regular *i* of the last mentioned forms is often replaced by the *e* of the infinitive In midland and southern ME there are three main forms *ȝeven, ȝeven* and *ȝeoven*. The third of these is rare, and disappears *c* 1200 The relation of the other two forms is obscure, as both sometimes occur in the same text (e g in Layamon, where the earlier version favours *ȝeve-n*, the later *ȝeven*, but neither is consistent) In such cases the difference may be merely graphic, and due to an indeterminate vowel Some texts, however, show an exclusive use of one or other of the forms, thus *ȝeven* is regular in the Ancren Riwle, while the Ayenbite has only *ȝeven* The forms with initial guttural are first recorded in the Ormulum (if north east midland, *c* 1200), though the form with *ȝ* is much more frequent (Apparent earlier instances with initial *g* occur only in MSS which confuse *g* and *ȝ*) The *g* forms, however, certainly originated in the north (though the want of 12th c northern texts renders direct proof impossible), and, as they do not admit of being like *ȝ* palatalized (*g* of *begynd*) explained by the products of analogy, it seems most probable that they are due to Scandinavian influence The regular form of the infinitive in early northern texts is *gif, give*, which rather corresponds to Sw *ge̊fva*, Da *give*, than to ON *gefa*. On the other hand, the pa. ple is as early quite written with *e* as well as *i* (*gefin, gifin*, etc , see the forms below), and *e* also appears in some contracted forms as *ges* (= gives) In the 15th and 16th c the form *give* (*geef*, etc) is common both in English and Scottish writers, Levins (1570) pl ues it along with *geve*, *gyve*, etc In the 14–15th c the northern forms extended themselves gradually to the midland dialects Havelok (*c* 1300) has, like the Ormulum, both the *ȝ* and the *g* forms, R Brunne's *Handlyng Synne* (1303) has only the former, but his Chronicle (*c* 1330), according to the two existing MSS, has always *g*. Langland has both forms, well attested by the alliteration, but Chaucer seems to have always written *ȝeve, ȝaf*, and throughout the greater part of the 15th c the palatal forms predominate in midland (including East Anglian) as well as in southern writers The MSS of Fortescue, *c* 1470, exhibit as common also in the London documents after 1430 (Morsbach, *Eng Schrift sprache* 98) About 1500 the palatal forms disappear entirely from the literary language, and have left only very faint traces in the modern dialects

In the 14–15th c the pa. pple was sometimes conformed to the analogy of the *e, a, o* vbs with *i, -r* roots (cf GET), this took place with both the midland and northern forms, but *ȝoven* is found more frequently than *ȝoven*]

to the Northumbrian gospels, the Lat *darv* is never rendered by ȝeaf/e or its compounds, but always by (a-, ge-) *sylle*. In early ME. the vb *sell* became obsolete except in the limited sense = L. *vendere*, and its meanings passed over to *give*. While, however, *give* thus acquired a widened sense (for the process of development of which cf *donner* to give = L. *donare* to present), it retained at the same time the specific meaning which it had in OE. In mod Eng both the wider and the narrower senses are still current, so that while *give* may be used as an antithesis of *sell*, *pay*, or *lend*, it may also be contextually equivalent to any of those vbs.

The construction, wherever nothing is said to the contrary, is with *to (unto)* or *dative*.

The orig. stem **glīwjo*- was variously treated in OE., yielding the forms *glīeg*-, *glīg*- (in compounds and oblique cases), *gliw* (the nom. is found only in glosses), but *glīwes*, etc. are common in poetry, more rarely *gléow*-), and *glīo* (poetic). From the two latter forms came ME. *glew* and *gle*, of which *glew* became obs. in the 16th c., surviving longest in the northern dialects (Cf. Hur from orig. **hwīwjo*-)

In OE. and ME. the word is chiefly poetic. After the 15th c. it seems to have been rarely used, and in the 17th c. is almost entirely absent from literature. Phillips (1706) marks it as obsolete, and Johnson considered it a merely comic word (see q. 1755). It again became common towards the end of the 18th c., but the cause of its revival is not apparent.]

c A musical composition, of English origin, for three or more voices (one voice to each part), set to words of any character, grave or gay, often consisting of two or more contrasted movements, and in strict use) without accompaniment

The glee differs from the *madrigal* in involving little or no contrapuntal imitation, and from the *part-song* in the independence of its parts, which form 'a series of interwoven melodies' (Stainer & Barrett)

Until the middle of the 18th c. the form *glen* occurs in English writers only as an echo of Spenser; the 'Glosse' to the *Shepherd's Calendar* by E. K. wrongly explains the word as 'a country hamlet or borough'.]

At first applied to the narrow valleys of the mountainous

districts in Scotland and Ireland, but now extended to similar places in other countries.
